TLF Learning object - what's new?

The Learning Federation (www.tlf.edu.au) continues to publish high quality, curriculum focused learning objects to support science education through to grade 10. Join a discussion on the published objects and the ways in which they have been implemented in classroom programmes to date. With plenty of time to explore the objects for yourself during the workshop, and a CD full to take away with you, don't miss out on this hands on opportunity.
