Activities to support the NSW theme: Energy: future challenges

This practical, hands-on session will provide you with ideas on how you can best prepare for the National Science Week 2005 theme: Energy: future challenges. School and class-based activities and ideas for integrated-studies units will be presented. You will also be given information about excursions, incursions, places to get resources and useful web sites. Support material and a free solar, wind-powered clothes-drier will be provided to every participant.

Block: 2

Participant Limit: 30
