

Fourth International Workshop on the Management of Diamondback Moth and Other Crucifer Pests

The University of Melbourne, Australia
26th – 29th November 2001

Guidelines for Paper Preparation for Workshop Proceedings (required for both poster and oral presentations)

1. **Style and Format**

Manuscripts, written in clear concise English, should be typed in double spacing throughout. It is recommended that articles be subdivided into Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgements and References. The length of the entire manuscript should be no more than twelve pages, including tables, figures and references. The text should be formatted with an 11 point Arial font. Headings (**Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgements and References**) should be in **bold** typeface. Subheadings should be in italics, e.g. *Experiment 1*.

2. **Titles, Author's Name and Affiliation**

These should be included in the first page. The title should be concise, but informative. A running title of not more than ten words should be supplied. Author's affiliation(s) should bear the full name(s) of the Department(s) and Institutions(s) and full postal address(es).

3. **Abstract (to be submitted by 31st August 2001)**

An informative abstract not exceeding 300 words should be provided below the author's affiliation on the first page.

4. **Key Words**

A list of 3-5 key words is to be provided directly below the Abstract.

5. **Footnotes**

Do not use footnotes in the text. Indicate table footnotes with superscript lowercase letters. Type table footnotes alphabetically in separate paragraphs at the bottom of each table.

6. **Nomenclature**

The use of scientific names in italics is preferred throughout the text. When common names are used, they should conform to the standard usage. The first time a common name is used it should be accompanied by the scientific name and the author. Also, for insects, include order and family at the first mention of its binomial in the text. For pesticides, use the accepted common name. If the chemical is new and does not have a common name, use its trade name with the first letter capitalized.

7. **Use of Units and Abbreviations**

Use the metric system and avoid national units of measurement.

8. **Tables and Figures**

Tables should be self-explanatory and figures should be of publishing quality. Tables and Figures should each be numbered consecutively in Arabic numerals and referred to in the text as Table 1, Figure 1, etc. Prepare tables without vertical lines between columns. Single 1 point horizontal lines should be placed above and below table headings and at the end of tables. Table and Figure headings should be in **bold** typeface.

Tables should be typed in numerical order individually, on separate pages and numbered consecutively with Arabic numerals. All tables must have a clear and concise heading and should be self explanatory without reference to the text.

Fourth International Workshop on the Management of Diamondback Moth and Other Crucifer Pests

The University of Melbourne, Australia
26th – 29th November 2001

Number all illustrations consecutively with Arabic numerals. Legends should be typed together on a separate page, double-spaced. Do not incorporate the legend into the figure itself.

9. References

Only publications cited in the text should be given in the references. Unpublished data should not be cited. Personal communications, although not encouraged, may be cited when essential to the text. Give references in the text as follows: (Ridland 1978); Ridland (1978); (Baker and Kovaliski 1999); Baker and Kovaliski (1999); Keller *et al.* (2000)

Format for citing in references:

- Journal article

Baker, GJ and Kovaliski, J. (1999). Detection of insecticide resistance in *Plutella xylostella* (L.) (Lepidoptera: Plutellidae) populations in South Australian crucifer crops. *Australian Journal of Entomology* **38**: 132 – 134.

- Edited work

Endersby, NM and Ridland, PM. (1997). Insecticide resistance in diamondback moth, *Plutella xylostella* (L.) in southern Australia. In A. Sivapragasam, W. H. Loke, A. K. Hussan & G. S. Lim [eds.], *The Management of Diamondback Moth and other Crucifer Pests*. Malaysian Agricultural Research and Development Institute, Kuala Lumpur, Malaysia.

- Book

Common, IFB (1990). *Moths of Australia*. Melbourne University Press, Carlton, Victoria, Australia.

10. Peer Review

Please ask colleagues to review the paper carefully before forwarding. Before final publication, the editorial committee will ensure that the papers are of appropriate quality.

11. Submission of Manuscript

Abstract due: 31st August 2001

Full manuscript due: 31st December 2001. Please note that papers received after this date will not be included in the Workshop Proceedings.

Format: Please submit your manuscript as a Microsoft Word Document and ASCII file by e-mail or on 3.5" computer disk.

Please note that the Workshop Proceedings containing the full papers will be prepared after the Workshop and will be sent to delegates early in 2002. Delegates will receive a Program of Abstracts when they register at the Workshop in November.
